# Put water to work

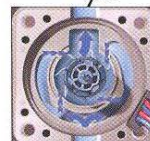

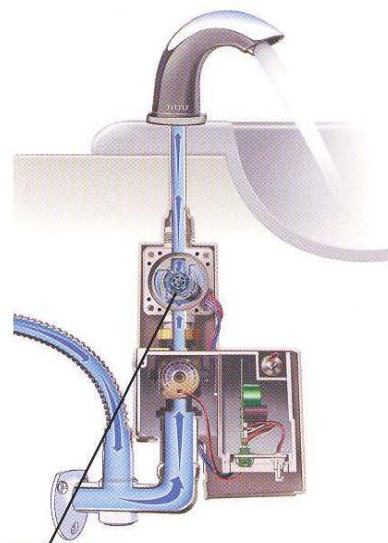

TOTO

Introducing EcoPower, the new  
hydropower sensor faucet from TOTO.

EcoPower is the first sensor faucet that powers itself using just water. When the faucet is used, water flows through an inline hydropower micro-turbine. As the turbine spins, energy's harnessed and stored in a rechargeable battery, reducing the need for regular maintenance and battery replacement for up to 10 years. That's good for the environment—and good for your business.

Less maintenance. Less water. Less energy. Less overhead.  
The EcoPower faucet by TOTO, available in standard and  
gooseneck spouts..

**TOTO**<sup>®</sup>  
Perfection by Design

#### Spin Cycle

TOTO's hydropower  
micro-turbine recharges  
the unit with every use.
